

## Data Breach Response Policy

Last updated: February 2025

## 1. Introduction

This policy is designed to ensure Enrich Learning Trust, its employees, agents and contractors can identify data breaches and meet the requirements of Data Protection Legislation in the handling of a personal data breach (henceforth “personal data breach” or “data breach”).

Data Protection Legislation means the Data Protection Act 2018 (DPA2018), United Kingdom General Data Protection Regulation (UK GDPR), the Privacy and Electronic Communications (EC Directive) Regulations 2003 and any legislation implemented in connection with the aforementioned legislation. Where data is processed by a controller or processor established in the European Union or comprises the data of people in the European Union, it also includes the EU General Data Protection Regulation (EU GDPR). This includes any replacement legislation coming into effect from time to time.

A personal data breach is defined within the Data Protection Legislation as “a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data transmitted, stored or otherwise processed”. Personal data breaches can include:

- access by an unauthorised third party;
- deliberate or accidental actions by a controller or processor or their employees, agents or contractors;
- human error affected personal data;
- sending personal data to an unauthorised recipient;
- network intrusions;
- loss or theft of confidential or sensitive data or equipment on which such data is stored (e.g. loss of laptop, USB stick, iPad / tablet device, or paper record);
- alteration of personal data without permission;
- loss of availability of personal data.

The notification requirements associated with data breaches rest on the level of risk to the rights and freedoms of data subjects arising from the breach. Unless a personal data breach is unlikely to result in a risk to the rights and freedoms of the concerned data subjects, it is to be reported to the ICO or relevant supervisory authority. Where such data breaches are likely to result in a high risk to the rights and freedoms of the concerned data subjects, the affected data subjects are to be informed in addition to the supervisory authority.

The Data Protection Legislation further stipulates that where notification to the supervisory authority is required, this should take place within 72 hours of the controller becoming aware of the personal data breach. In the case of breaches which pose a high risk to data subjects, the additional requirement to notify data subjects must be done as soon as possible and without undue delay.

In light of these requirements, this policy focuses on the responsibilities of all employees, agents and contractors associated with Enrich Learning Trust in internally reporting breaches and the external notification requirements.

## **2. Definition of Terms Used Within this Policy**

- a. Any reference to “Article” or “Articles” is a reference to an Article or Articles of the “EU GDPR” the DPA 2018 and the UK GDPR.
- b. The terms ‘personal data’, ‘data subject’, ‘processing’, ‘pseudonymisation’, ‘controller’, ‘processor’, ‘recipient’, ‘third party’, ‘consent’, ‘personal data breach’, have the meanings set out in Article 4 of the GDPR.
- c. “Security incident” means an incident in which the security of personal data may have been compromised but no risk is identified in respect of the rights and freedoms of data subjects. Security incident in the context of this policy may also be used to define an event or action which may compromise the confidentiality, integrity or availability of systems or data, where such event or action does not presently amount to a reportable data breach.

## **3. Breach Detection and Reporting**

A personal data breach or security incident may be detected by any individual who accesses or interacts with systems, records and information belonging to or in the possession of Enrich Learning Trust and the schools within the Trust. As such, all employees, agents, contractors and processors of Enrich Learning Trust are responsible for reporting any suspected or actual security incident or data breach.

All security incidents and data breaches, suspected or actual must be reported immediately upon detection. This includes any incidents or data breaches detected outside normal working hours.

When reporting a security incident or personal data breach, suspected or actual, the reporter is obliged to disclose all information within their knowledge using the Breach Report Form annexed to this Policy (Annex 1).

Employees, agents and contractors of Enrich Learning Trust must report all incidents, including those resulting from human error and those with unidentified or unknown affected data subjects as soon as detected.

#### **4. Breach Investigation**

Enrich Learning Trust and schools within the Trust aim to complete a preliminary investigation of all reported incidents without undue delay. Enrich Learning Trust aims to establish its awareness of a personal data breach within the first 24 hours of internal detection. Awareness can be established once it is determined that the reported security incident involves personal data which may be compromised as a result of the security incident. From this point, there are 72 hours within which to identify whether there is a risk to the concerned data subjects and where there is a risk, notification to the supervisory authority should take place.

During the initial investigation, Enrich Learning Trust aims to establish the following:

- The facts of the security incident
- The data or records concerned
- The value and sensitivity of the data or records concerned
- The type of breach suspected (confidentiality, availability, integrity)
- The number and identity of affected data subjects
- The likely consequences of the breach
- The measures required to contain the impact of the breach.

#### **5. Notification to the Supervisory Authority**

All personal data breaches which pose a risk to the rights and freedoms of data subjects will be reported to the Information Commissioner's Office (ICO). Enrich Learning Trust aims to ensure all such notifications are made within 72 hours of becoming aware of the personal data breach.

All notifications to the ICO must be made with the authorisation of a member of the Trust's Executive Team following advice from the DPO Centre and will be made using the breach notification form provided by the ICO.

#### **6. Communicating High Risk Data Breaches**

Where a high risk to the rights and freedoms of data subjects is established, Enrich Learning Trust will inform data subjects of the personal data breach as soon as possible and without undue delay. Communication to data subjects should include:

- The nature of the breach
- The name and contact details of the Data Protection Officer or other contact person
- The likely consequence of the breach
- The measures taken or proposed to be taken by the controller to address the breach
- Any recommended steps to be taken by the data subjects themselves e.g. changing passwords.

Enrich Learning Trust aims to notify data subjects of relevant personal data breaches directly unless it is impossible to do so, or it would involve a disproportionate effort, in which case the breach may be communicated by way of a public statement. All such communications must be authorised by a member of the Trust's Executive Team.

## **7. Accountability**

All security incidents reported will be documented regardless of whether the breach was notifiable to the ICO. Enrich Learning Trust and its schools will maintain a breach register containing all reported incidents.

## Annex 1

Please complete this form if you have detected or been advised of a data breach. It is imperative that you complete this form immediately upon detection and where possible, please advise your line manager of the suspected breach immediately.

Once completed, please email this form to the Headteacher or the school's Privacy Officer.

Incident / breach details	
Name of person reporting incident:	
Contact details of person reporting incident:	
Date(s) incident took place:	
Date you detected the incident:	
Place of incident:	
Brief description of how you became aware of the incident:	
Brief description of the incident including details of the data, records or systems believed to be affected:	
Approximate number of affected data subjects, if known:	
Approximate number of affected records, if known:	
Any actions taken in response to the incident:
