Dear Parent/Carer

Science Revision Guides and Workbooks

I am writing to introduce two excellent revision resources to support students in their preparation for their Science GCSE's. All students are invited to the "Science Revision Zone", which is on Microsoft Teams and contains a wealth of revision materials to support and challenge them. It is well worth looking into this early to discover what resources work well and challenge your child/ward.

As a school we are fortunate to be able to offer the opportunity to purchase CGP GCSE Science Revision Guides and Workbooks for Biology, Chemistry and Physics at a significant discounted price of up to 40% off the publisher's price.

We believe these books greatly benefit students in preparation for their exams, in addition to supporting them throughout the teaching of the course. They contain comprehensive revision notes and exam style questions, with answers.

If your child/ward would like to purchase a set of revision guides/workbooks they are available to purchase through WisePay. **The deadline date for ordering these is Sunday 11 October 2026.**

Once the books have arrived, I will let students know via the student notices, and they can collect them during any break/lunch time or come and collect them during their Science lesson. It is **their** responsibility to collect them. We usually have a high number of orders; therefore, I am unable to deliver them to the students personally.

The cost of the Revision Guides and Workbooks are as follows:

Combined Science (Sets C, G and M) - £13.50 (RRP £20.99)

Set M will receive the higher book and Sets C and G will receive the foundation book (unless you specifically select otherwise).

Separate Sciences (Set I) - £20.89 (RRP £41.25)

Students taking separate Sciences will receive the higher book.

If you have any questions, please do not hesitate to contact me on: m.hart@taverhamhigh.org

Yours faithfully

Mr M Hart
Head of Science Faculty
